CENTRE D'INTÉRÊTS

- Basketball
- Music creation (DAW)
- Video Game Development
- Participation in competitions such as hackathons and game jams

OTHER

- President and founding member of the DevGameENI club

ABOUT ME

Enthusiastic and passionate about web development, I am a developer determined to make a significant contribution to innovative projects. With a strong academic background and practical experience in creating websites and web applications, I am motivated to acquire new skills and tackle the technical challenges that arise.

EXPERIENCES

Fullstack Developer & Automation Group SOIBY

December 2025 – May 2026

As the lead architect and developer on the Pilote360, Cloud Soiby, and Winedger SaaS platforms, I led the evolution of their technical ecosystems. My expertise focused on redesigning backend and frontend architectures, optimizing database queries for performance, and integrating new features.

Role: Fullstack Developer

Technologies : Django, Flask, ReactJS, Tailwind CSS, MongoDB, N8N, AI-Driven Development, APIs Stripe,

Technical Mentor – No-Code Hackathon ISCAM University

January – February 2026

I mentored six teams of beginners through three intensive visual prototyping competitions. I led the ideation and interface design process using Figma, while integrating generative AI tools such as Google AI Studio, Stitch AI, and FigmaMake to accelerate the production of functional deliverables. This project required strong teaching skills and rigorous time management to transform novice concepts into high-quality prototypes.

Technologies : Figma, FigmaMake, Stitch AI, Google AI Studio, V0

Educational Project: SCO APP Fianarantsoa

November 2025

Development of a web application for managing student records, from design to production. This tool allows school staff to efficiently manage and process various administrative requests.

Role: Back-End Developer

Technologies : Next.js, Flask, PostgreSQL, Ably

Freelance : Need Kosher Fianarantsoa

February – June 2025

Development of a web application integrating travel, events and catering services, designed to centralize and facilitate the sharing of information within the Jewish community, from design to production.

Rôle: Développeur Web Front-End & Back-End

Technologies : Nuxt.js, Express.js, Sequelize, MySQL

Web Developer Intern

ACEEM University | Antananarivo

August – November 2024

Design and implementation of a web application with Laravel and Tailwind CSS to digitize all financial flows of the ACEEM university.

Theme : Design and implementation of an Emergency Work Management application

Technologies : Laravel (Blade), Tailwind CSS, MySQL

Solo educational project

ENI I Fianarantsoa

July – August 2024

Design and development of the “Call-Law” mobile application, for managing appointments with lawyers.

Role: Fullstack Developer

Technologies : React Native (TS), Django, PostgreSQL

Team educational project

ENI I Fianarantsoa

April – May 2024

Creation of an application that sells dairy products and contains a simulation of a payment system.

Rôle : Développeur backend, Intégrateur

Technologies : ReactJS, Tailwind CSS, Django, PostgreSQL

Web Developer Intern

Ministry of Public Works | Antananarivo September – December 2023

Development of a web application which aims to facilitate the control, streamlining and sharing of information with an emergency typology at the Central and Regional level of emergency work in real time.

Theme: Design and implementation of an Emergency Work Management application

Technologies : Laravel, Quasar (Vue Js), PostgreSQL

TRAINING, CERTIFICATION AND OTHER

GameUp Africa Bootcamp

September – December 2025

Intensive training specializing in video game development using the Godot engine. Under the mentorship of industry experts, I gained mastery of professional production pipelines and gameplay mechanics. This program allowed me to design and fully develop three games, strengthening my algorithmic rigor and my ability to transform a creative vision into an interactive product.

Technologies : Godot, Clickup, Google Docs

Data Science avec Knime

June – July 2025

Introduction to the fundamentals of Data Science and learning the KNIME tool for data processing. This training enabled me to master the creation of analytical workflows and understand the essential principles of Machine Learning algorithms for decision support.

Technology : Knime

Event Project Management: Double Winner at the Gameload Game Jam

April-May 2025

As club president, I orchestrated our members' participation in the Gameload Game Jam. From finding partners to logistical planning with the founder, I coordinated the teams throughout the event. This meticulous organization allowed the club to distinguish itself by winning two prizes in the competition.
